## THE WAR ON TERROR - The Boardgame

The 'War on Terror' was once just a violent hobby for greedy imperialists. Now, courtesy of TerrorBull Games, it's also a boardgame! That's right, now everyone can experience the thrill of waging war on an abstract noun - and liberate the world in the process.

Conceived on the eve of the Iraq war in 2003, the various machinations of global power-politics set the stage for this satirical boardgame. It seemed only fitting that the 'Axis of Evil' should be a spinner in the middle of the board. Almost three painful years later, *War on Terror, the boardgame* is ready for production.

A quality boardgame for 2-6 players, everything has been brilliantly illustrated by award-winning illustrator and cartoonist, Tom Morgan-Jones. In the box there's money, oil counters, Axis of Evil spinner, secret message pads and even a free 'EVIL balaclava'. All you need to fight the war on terror from your home.

Whether you chose to fund or fight terrorism, *War on Terror, the boardgame* is unlike any game you've ever played. It turns you against everything you hold dear - your friends, your family and even your own morals. Several games have been attributed with splitting up relationships, forging relationships, inciting tantrums, tears and lots of shouting - being a global superpower is not a peaceful night in. Everyone, though, comes back for more.

Brainchild of Cambridge natives, Andrew Sheerin and Andy Tompkins, TerrorBull Games was founded on the principle of "playing with your mind" and is on a mission to create a new breed of satirical boardgame. With global warming and immigration earmarked for TBG treatment, TerrorBull Games are set to take the games market by storm, if not by surprise.

Do you enjoy spreading filthy propaganda?

Do you revel in rampant paranoia? Does the thought of regime changes, revolutions, political kidnappings and plane hijacks excite you? Notwithstanding the secret treaties, forged documents, oil prospecting, dodgy collaborations, diplomats and suicide bombers? Are you cunning, conniving, duplicitous, destructive and frequently plot your friends' demise? Well this is the game for you. Now you can engage in war and the casual funding of terrorism, without the social repercussions and political backlash.

**"YOU'RE EITHER WITH THEM OR AGAINST THEM... OR SOMETIMES YOU'RE BOTH!"**

"We wanted to diffuse the language of terrorism - it's being (ab)used by governments and the unquestioning media to control people and instil them with fear. Instead, we want people to laugh at it. Once we've reclaimed the language of fear then maybe an honest discussion can start."

**Andrew Sheerin**, director TerrorBull Games

"Since our first prototype for the Axis of Evil spinner we've had nearly three years of war in Iraq, suicide bombers in London and the only weapons of mass destruction I've spotted are being used by us. Some people suggest that turning the War on Terror into a boardgame is a tad insensitive. I always reply that starting a war is insensitive, a boardgame is just fun for the family."

**Andy Tompkins**, director TerrorBull Games
